

# **Contribution to the Safer World – PAC's Perspective**

**Chinese Taipei  
17 September 2018**

Ms Chang Kwei Fern  
PAC Chair

# Outline

- Role of Accreditation
- Global Estimates and Trends in Workplace Safety and Health
- Global Estimates and Trends in Food Safety
- Assurance Domestically
- Recognition Regional and Internationally – PAC Multilateral Recognition Arrangements (MLAs)

# Role of Accreditation

## Check the Checkers

**“One Test/Certification by a Competent Body, accepted Worldwide”**

Platform for international acceptance of national accreditation systems

Global Mutual Recognition Arrangement (MRA) on Accreditation

National System to ensure compliance to international standards and practices

**National Accreditation Body**

**Confidence** in the technical **competency & integrity** of the service providers

Calibration & Testing laboratories

Mgt Systems & Product Certification Bodies

Persons Certification Bodies

GHG Validation & verification bodies

Inspection Bodies

Conformity Assessment Bodies (CABs)

**Assurance** in Products & Services rendered & Skills

**Industry (Products & Services & Skills)**

Construction materials  
Welds Paint  
Quality Mgt Systems

Ready-mixed concrete  
Fire Doors  
Env't Mgt Systems

Lifts  
Skilled Personnel  
OSH Mgt Systems

Structural Steelwork  
Soil investigation  
Energy Mgt Systems

# Global Estimates of Workplace Safety & Health

## Fatalities

2.78 million fatalities per year as a result of occupational accidents or work related diseases (7,500 people die every day; 1,000 from occupational accidents & 6,500 from work-related disease)

## Injuries and Diseases

374 million non-fatal work related injuries and illnesses every year

## Productivity

Poor occupational safety and health practices estimated to cost 3.94% global Gross Domestic Product each year

*Reference: Global Estimates of Occupational Accidents and Work-related Illnesses 2017, Published by WSH Institute (Singapore) & Ministry of Social Affairs and Health (Finland)*

# Global Trends in Workplace Health & Safety

- Introducing global standard for occupational health and safety management systems
  - ISO 45001 has the potential to push safety and compliance management forward on a global level
- New Legislation to ensure Workplace Health & Safety Compliance
- Digital Transformation
  - Adoption of predictive analytics and big data technologies to make data-driven safety and compliance decisions
- Rising demand for well-trained and certified safety personnel

# Global Trends in Food Safety

- Food supply chain becomes increasingly global
  - increased potential for food safety issues and traceability is critical
- Global harmonization of Food Safety Standards and Regulations is a significant challenge
  - use of preventive tools such as HACCP for achieving food safety across the world
- Consumer Awareness
  - foodborne illness on the rise and is a key concern
- Technological and scientific breakthroughs
  - better technology and analytical methods in detecting chemical and microbiological hazards, giving quick results with better accuracy, reproducibility and reliability

*WHO: An estimated 600 million – almost 1 in 10 people in the world – fall sick from consumption of contaminated food and 420,000 people die per year, resulting in the loss of 33 million healthy life years*

# Accreditation - supports assurance across various industries

**Food**

**Building & Construction**

**Healthcare**

**Biomedical**

**Chemicals**

**Electrical & Electronics**

**Environmental**

**Info Technology**

# Accreditation supporting **Emerging Areas**

- Network Security

## Internet of Things

- Encryption

- Information Privacy

- Data Protection

# Assurance Domestically

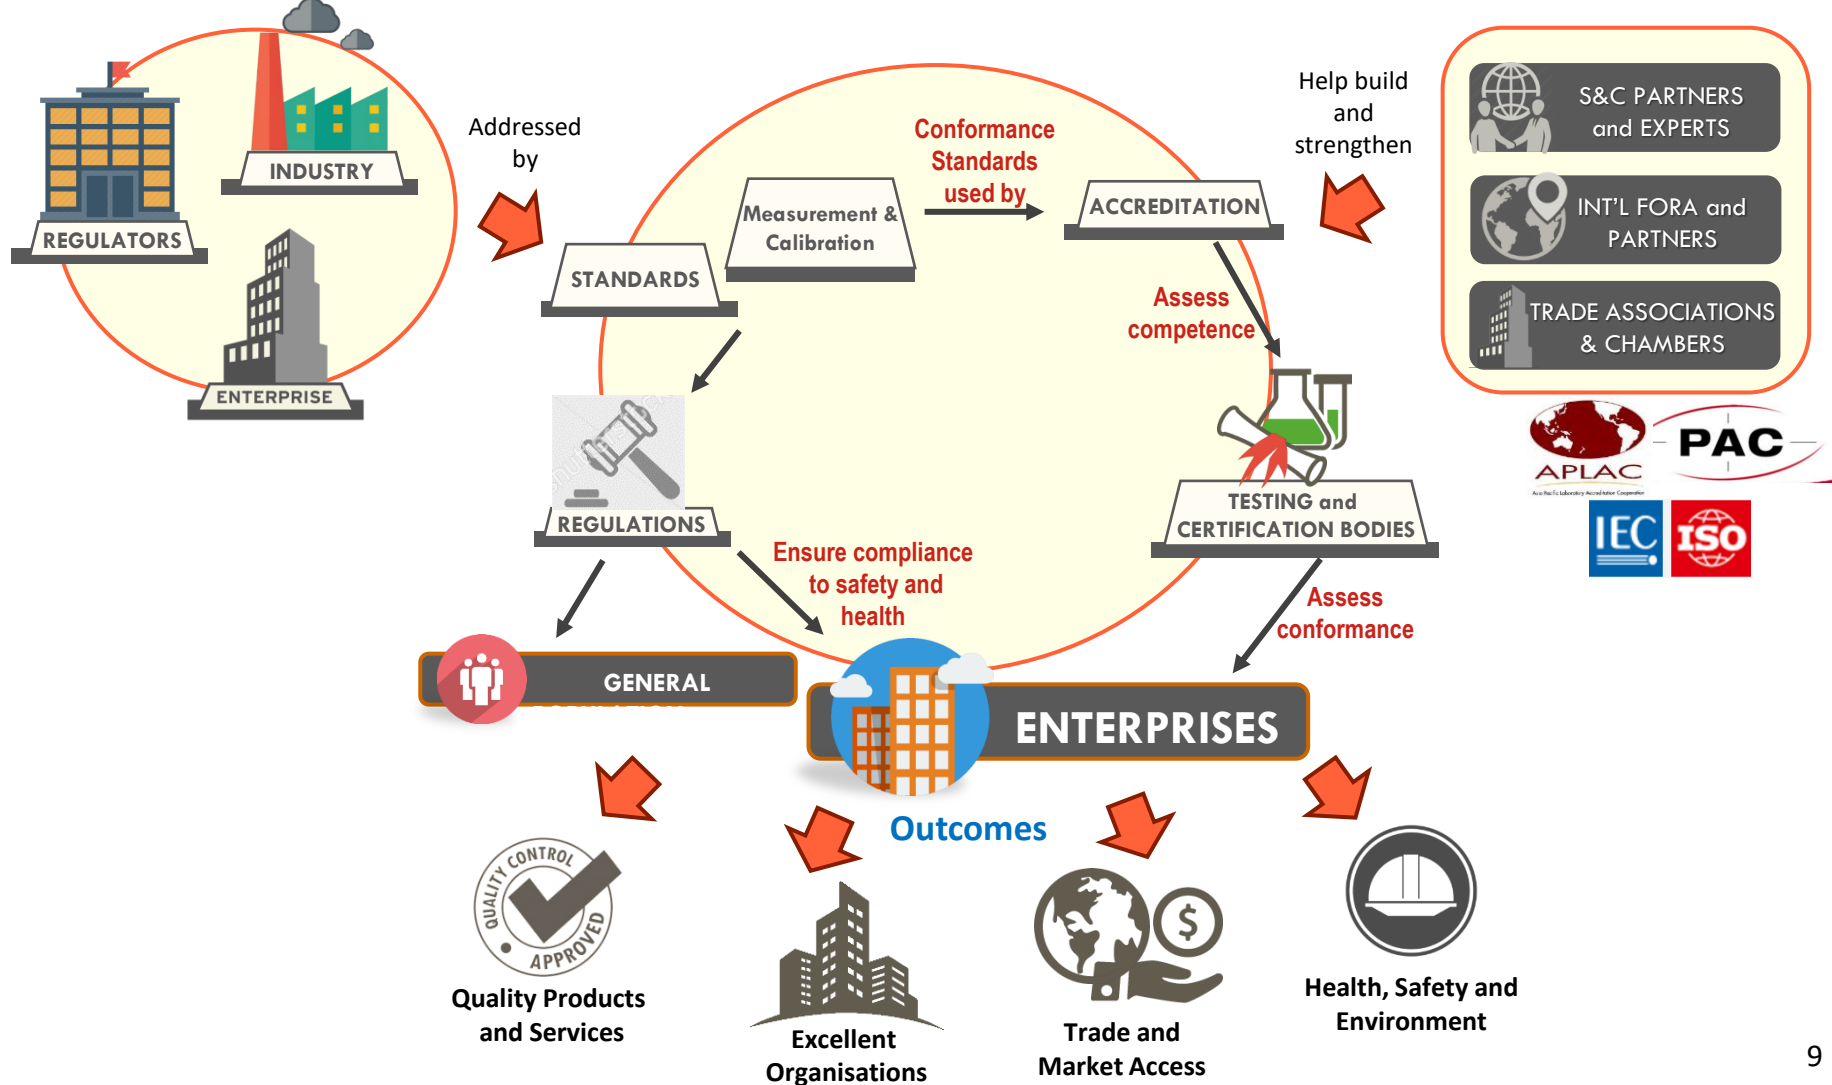

## Quality Ecosystem

### Needs

### Standards & Conformance Levers

### Stakeholders

## Accreditation as a Tool to support **Regulators**

**Ministry of Manpower (MOM)** regulates the workplace safety and health in Singapore to safeguard the welfare of persons at work in a workplace.

- Requires accredited testing of safety helmets, shoes, relief valves & accredited inspection of pressure vessels
- Requires training providers for safety courses to attain accredited certification
- Requires companies to obtain accredited OSHMS certification

**Building and Construction Authority (BCA)** ensures high safety standards and promotes quality excellence in the built environment.

- Requires all construction materials to be tested by accredited laboratories & ready-mixed concrete to be certified by SAC accredited certification bodies
- Requires inspection of structural steelwork and soil investigation to be done by accredited inspection bodies

## Accreditation as a Tool to support **Regulators**

**Agri-Food & Veterinary Authority of Singapore (AVA)** operates a regulatory food analytical laboratory under Veterinary Public Health Laboratory (VPHL) which is accredited by SAC.

**Agri-Food & Veterinary**  
Authority of Singapore

- **Conformance** to International Standards
- Demonstrated **capacity** and **capabilities** to produce accurate testing results
- **Provides assurance** to regulatory counterparts locally and internationally for import and export testing

**National Environment Agency (NEA)** is responsible for regulations of water safety in areas such as swimming pools, cooling towers and water fountains. Leverages accredited water testing laboratories to support regulatory compliance.

**National  
Environment  
Agency**  
Safeguard · Nurture · Cherish

- **Regulatory requirement** of Heterotrophic Plate Count (HPC) or Standard Plate Count (SPC) testing on all swimming pools, cooling towers and water fountains
- **Accredited water testing** laboratories supports regulatory compliance with competent testing capabilities and facilities

# Recognition Regional & Internationally

## Pacific Accreditation Cooperation (PAC)

Association of accreditation bodies and other interested parties whose objective is to **facilitate trade and commerce** among economies in the Asia Pacific region

Periodic peer evaluation ensures confidence on equivalence of accreditation results

34 Full Members,  
25 Signatories to the  
PAC MLA in  
22 economies

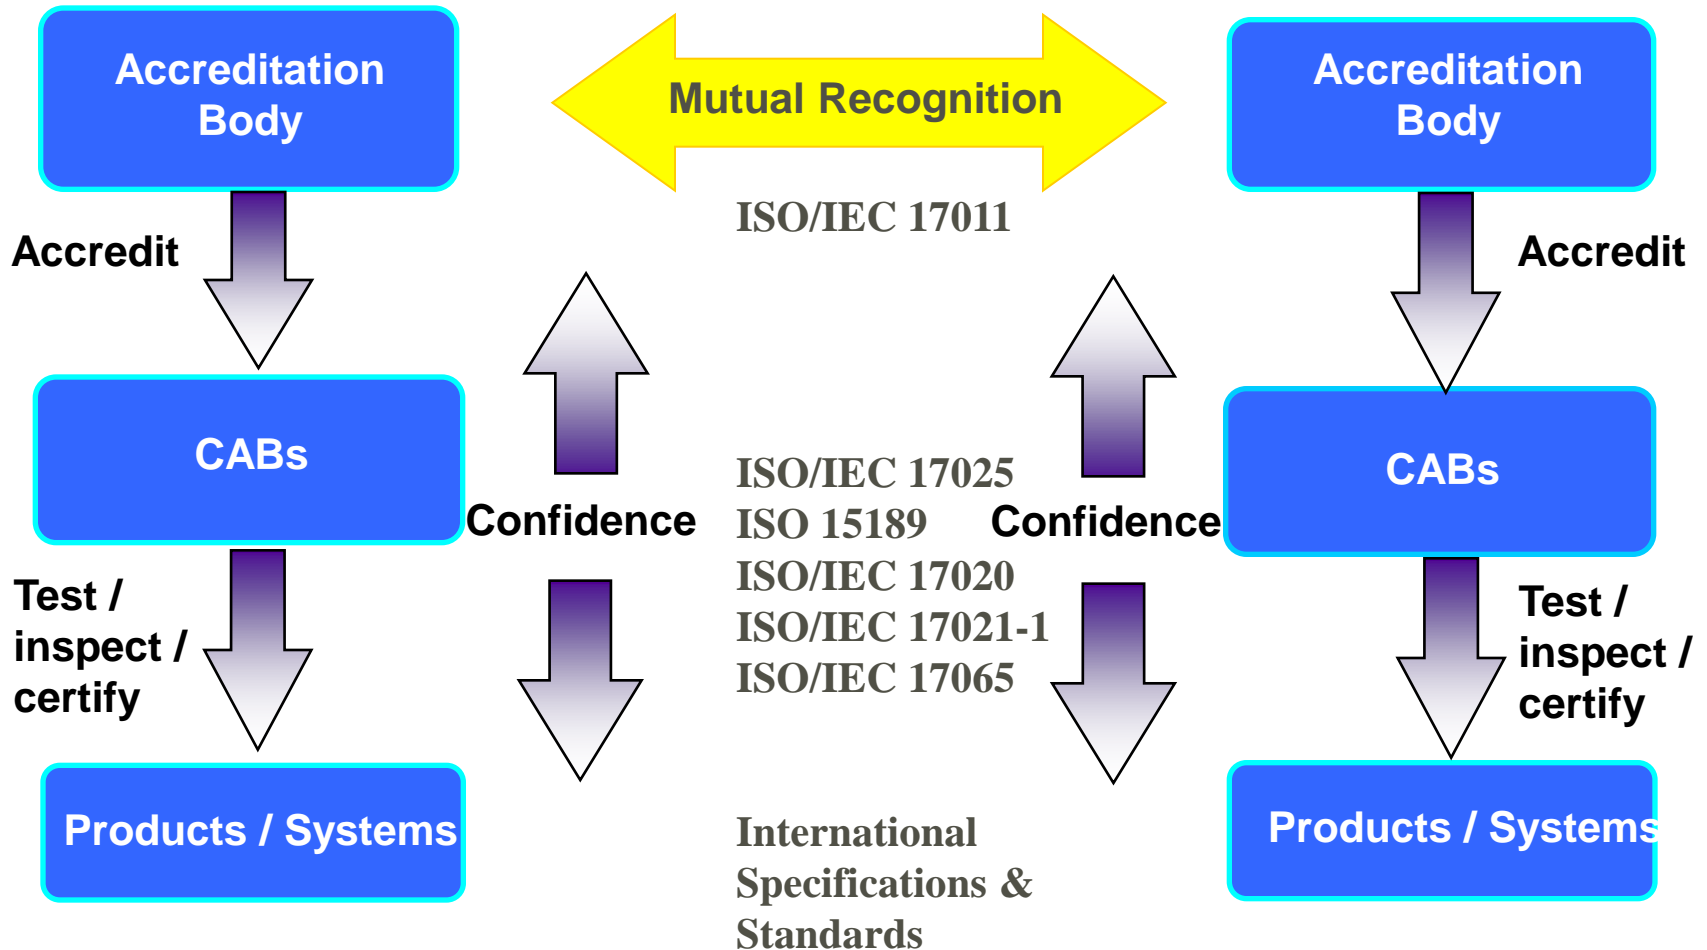

PAC MLAs for Mgt  
Systems, Product, GHG,  
Persons

Merger with Asia Pacific  
Accreditation Cooperation  
(APLAC), by 2019

PAC undertakes the peer evaluations of its member bodies and promotes the **international acceptance** of accreditations based on the equivalence of their accreditation programmes

## Mutual Recognition Arrangement (MRA)

# World Accreditation Structure

Global mutual recognition through arrangements of international and regional co-operations

**International**

**IAF/ILAC**

**Regional**

**PAC/APLAC**

**EA**

**IAAC**

**Others**

**Economies**
